OBJECTIVE

Motivated IT professional seeking a challenging position to leverage technical expertise in system support, macOS and iOS device management, and IT policy development to drive organizational success and professional growth.

EXPERIENCE

Support Systems Administrator

University of Missouri, Columbia, MO | Feb 2025 – Present

- Serve as the primary Jamf Pro administrator managing campus-wide Apple endpoints (macOS, iOS, tvOS), automating zero-touch OS deployments, software packaging, patch management, and backup/restore workflows across multiple collegiate units.
- Function as the lead subject matter expert providing Tier-3 technical support to distributed IT staff, resolving complex macOS/iOS system issues, and acting as the primary liaison with the Apple Technical Account Manager.
- Architect custom Bash/Zsh scripts, configuration profiles, and enterprise security baselines to eliminate manual administration, standardize IT operations, and align mixed-platform (Mac/Active Directory) environments across academic colleges.
- Manage endpoint deployment, software licensing, secure printing, and directory authentication for high-traffic student computing labs and faculty systems to ensure high availability and protocol compliance.

System Support Analyst

University of Missouri, Columbia, MO | Aug 2021 – Feb 2025

- Managed macOS and iOS devices using JAMF Pro, implementing security policies and deploying applications.
- Developed and maintained Bash scripts to automate repetitive tasks, streamline device management, and improve system efficiency.
- Administered and supported Pharos print management systems, ensuring seamless printing services and troubleshooting issues as needed.
- Collaborate with cross-functional teams to address technical challenges, achieving minimal downtime and improved system performance.
- Document technical workflows and procedures to streamline knowledge sharing and training initiatives.

EDUCATION

Bachelor of Science – Information Technology

University of Missouri, Columbia, MO

- Expected Graduation: December, 2026

Associate of Applied Science – Networking Systems Technology

State Technical College of Missouri, Linn, MO
